When you hold the binded key, it will switch out to your knife, and when you let go of the key, it will switch back to your last weapon used.. It is recommended you disable it UPDATE: I went back and tried enabling it again and got an FPS increase! (GTX1080)Use the benchmark linked in this guide to compare enabled/disabled.. Good aim and game sense comes from very good muscle memory, ingame experience (good & bad), learning to work as a team (trust is very important) and lots of repetitive training, nothing else.. If you are a natural talent, you might become better faster than some others, but you still have to put in the work. cea114251b [Quick Editing Program For Mac Photos](#)
